ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.*

(54) Title: SPRAY PREVENTION DEVICE

(57) Abstract: A device for preventing spray from emerging from the wheels of vehicles comprises a panel (4) that is adapted to be mounted substantially vertically behind a vehicle wheel (3) for receiving on a first side water released by the wheel (3) as it rotates. The panel (4) includes at least one passage (6) which leads from the first side to a rear second side of the panel (4). The or each passage (6) is other than normal to the plane of the panel (4). There is at least one water-collecting pocket (7A, 7B, 7C) along the side of the or each passage (6). In use, air and water enter the or each passage (6) and are separated so that air passes through the or each passage (6) and mixes with ambient air and water collects in the at least one water-collecting pocket (7A, 7B, 7C).
